

**OPFX, LLC**

**PRODUCTION RENTALS  
PRICE GUIDE & LOOKBOOK**

## Sean Christopher Ward, Director of OPFX, LLC

DJ, animator, artist, light tech, sound guy, tech nerd... No matter which field it is, there's one thing we can tell you about Sean and that is he is constantly looking to expand the horizons of art and technology and trying to create artwork and audio/video experiences that immerse his viewers in a surreal world of geometry and organic psychedelic design alongside amazing soundtracks! Over the past fifteen years of being in the cultures industry, he has worked alongside or had his artworks collected by so many inspirational people and organizations, like Burning Man, Art Basel, Paris Art Week, The Other Art Fair, Superfine, Android Jones, Universal Japan, Gitlab, Planetary Holdings, Aaron Lux, Elton John, Bob Dylan, Julie Floyd, Julien Hall, Milan Kordestani and so many more incredible individuals who have helped sculpt his journey in the arts! Stemming from a flat plane of design to the immersive nature of mapping, led screens, lighting and music, his journey is only beginning and he meekly hopes his creations will help inspire those around him, as well.

Throughout the last eight years, he has also been dabbling in productions. Coming from a humble little ddj setup with two stinger lights, to now creating productions for world touring artists, he has taught himself everything from the ground up and has become known for quality over quantity. He only takes on a certain amount of gigs each month, so that each experience is custom created from scratch to create the most unique environments for your events! As you read through this booklet, we will go through the many different rental options OPFX, LLC and Sean offer.

We hope to work with you soon!
